Dear Hiring Manager,

I am writing to express my interest in the Database Developer position as advertised on your social media platforms. After reviewing the core competencies and responsibilities, I am confident that my technical expertise, analytical mindset, and experience in both development and education uniquely qualify me for this role.

With over six years of experience across teaching, programming, and system operations, I have cultivated a deep proficiency in data management, backend development, and scripting languages. My knowledge of SQL-based systems, relational databases, and programming with Python and C# has allowed me to design scalable, efficient data solutions in collaborative environments. Additionally, my background in education has sharpened my ability to communicate complex technical concepts clearly —an asset when working cross-functionally or mentoring junior developers.

I approach each project with dedication, precision, and a results-driven mindset. Whether optimizing queries or modeling complex data relationships, I am committed to creating systems that are secure, maintainable, and aligned with organizational goals.

Attached is my CV, which outlines my qualifications and project experience in greater detail. I welcome the opportunity to further discuss how I can contribute to your team's success. Please feel free to contact me at your convenience to arrange a conversation.

Thank you for your time and consideration.

Sincerely,

Alisina Alizada

Alisina Alizada
Address: **Dasht_e_Barchi**, District 13th Kabul, Afghanistan

Professional Summary

Detail-oriented and solution-driven Database Developer with over six years of experience designing, implementing, and optimizing data-driven systems. Skilled in developing scalable database architectures, managing SQL and NoSQL environments, and ensuring data integrity across complex applications. Proficient in Python backend frameworks like Django, with a strong grasp of database security, query optimization, and performance tuning. Adept at bridging technical depth with clear communication, gained through a parallel career in academic instruction and mentorship. Committed to delivering efficient, maintainable, and well-documented solutions aligned with organizational goals.

Core Skills

Designing: Adobe Photoshop, Figma

Web Development: HTML, CSS, JavaScript, Bootstrap, ASP.NET Core MVC, SQL, Django, Git, Github.

Lab Environment: Linux operating system, Linux terminal, Vscode.

Work Experience

Graphic Design & Video Editing

Database developer | Nafi Homes Real Estate (Remote) | Jan 2024

- Developing database for his company.

Database Manager | Masoud Mustafa Hospital, Kabul | Jan 2020

- Designing and maintaining medical databases: Ensuring that electronic health records (EHR), patient demographics, lab results, and appointment logs are structured efficiently.
